INTERNSHIP INITIAL STATUS REPORT

Internship Title : Big Data Internship
Internship Duration : Six Weeks
Student Name : PAPABATHUNI NAGARAJU
Department : Computer Applications
Institution : Aditya University
Company/Organization : CodeTech IT Solutions
Guide/Supervisor : Neela Santhosh

Weekly Work Summary

Week 1 (Days 1-7) – Big Data Fundamentals & Hadoop Introduction
• Learned Big Data concepts, 5Vs of Big Data and industry applications.
• Studied Hadoop ecosystem and distributed storage concepts.
• Explored HDFS architecture and data management techniques.
• Understood internship objectives and project workflow.

Week 2 (Days 8-14) – Data Collection & Processing Techniques
• Explored data collection methods from APIs and datasets.
• Studied data preprocessing and transformation techniques.
• Worked on Real-Time Data Fetching concepts.
• Learned data quality assessment and validation methods.

Week 3 (Days 15-21) – Analytics, Visualization & Sentiment Analysis
• Installed Python, Jupyter Notebook and required libraries.
• Performed exploratory data analysis on sample datasets.
• Studied Big Data Visualization techniques.
• Started Big Data Sentiment Analysis workflow and implementation planning.
